## Golden Nails

**TRY** Star's fave golden shades (from top): L'Oréal Paris Pro Manicure nail polish in Goldy Lucks, \$5, drugstores. Essie nail polish in Shifting Power, \$8, [essie.com](http://essie.com). Nicole by OPI in First Crush Blush, \$8, Target stores. Lippmann Collection nail lacquer in Nefertiti, \$15, [lippmanncollection.com](http://lippmanncollection.com). Orly nail lacquer in Glitz, \$6, [sallybeauty.com](http://sallybeauty.com).

**F**OR the most part, this season's holiday beauty looks are classic. But not when it comes to nails — check out Beyoncé's glitzy gold tips! They're totally trendy and fun, plus there are many golden options to choose from. Slightly sheer shades work well on gals with fair skin, while ladies

with olive to dark skin, like Beyoncé, can fearlessly try heavily pigmented 14-karat hues. Once you've picked your gilded shade, polish wisely: Because these nail colors are yellow-based, it's important to use a nonyellowing base coat to prevent staining. After adding polish, use a high-shine top coat — it's a must to keep metallic polish sparkling!
